

Youth Program Evaluation

- This Program Evaluation is based on data from PY21-PY23 for Youth
- For this Program Evaluation of Youth, we will determine the effects supportive services and occupational skills training had on outcomes for participants.

The Program Evaluation Objectives Were to:

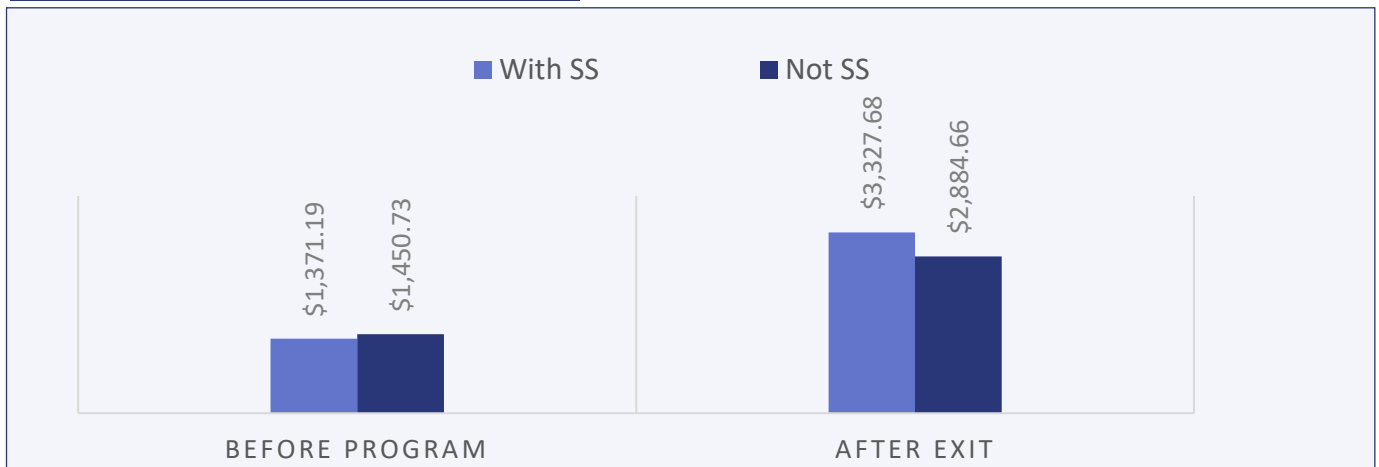

1.	Evaluate performance and identify best practices across local areas.
2.	Determine the effects supportive services had on outcomes for the Youth program.
3.	Determine the effects occupational skills training had on outcomes for the Youth program.

Key Findings of the Program Evaluation

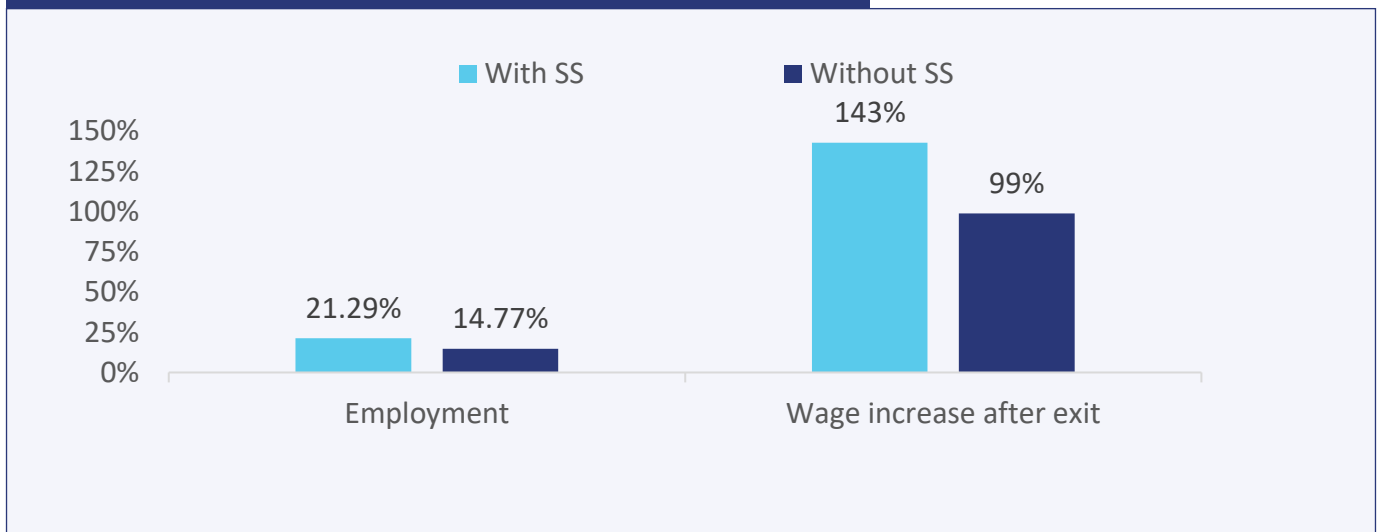

Performance Details

- Supportive Services had a positive effect on wages when comparing participants who received Supportive Services to participants who did not receive Supportive Services.
- Participants who received Supportive Services were more likely to attain employment after exiting the Youth program than participants who did not receive Supportive Services.

Supportive Services Effect on Wages

Supportive Services Effect on Employment and Wage Increase

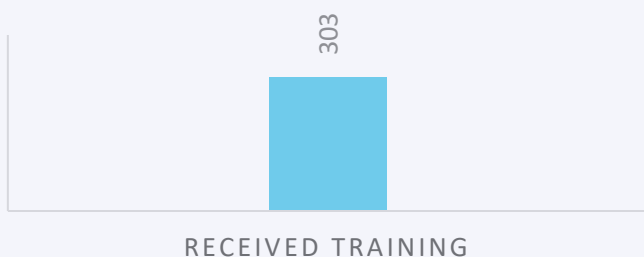

Youth Program Evaluation

- This Program Evaluation is based on data from PY21-PY23 for Youth
- For this Program Evaluation of Youth, we will determine the effects supportive services and training had on outcomes for participants.

Occupational Skills Training Duration

■ Average Number of Days

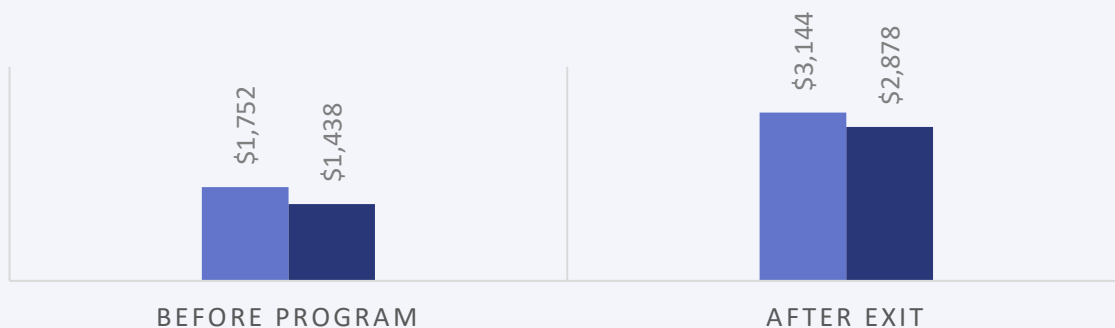

Key Findings of the Program Evaluation – Occupational Skills Training

Performance Details

- The average time period for Youth program participants receiving occupational skills training was 303 days.
- Occupational skills training through the Youth program had a positive effect on wages, although the relative wage increase for participants was higher amongst participants who did not receive occupational skills training.
- Participants who received occupational skills training through the Youth program were more likely to attain employment after exit than participants who did not receive occupational skills training.
